SKILLS

- **Languages:** Python, C, C++, Kotlin, Java
- **Frameworks:** HTML, CSS, Scikit-learn, Pandas, NumPy, DBMS, JavaScript
- **Tools/Platforms:** VS Code, Android Studio, Git
- **Soft Skills:** Problem-Solving, Team Player, Adaptability

PROJECTS

AI Investment Research agent | [Github](#)

June' 26

- Engineered a multi-agent, investment research system using LandGraph and next.JS to analyze the company profiles, financials market, sentiment, competition, and risk through a 6 node pipeline.
- Orchestrated real-time Server-Sent Events(SSE) streaming to deliver live progress, tracking and structured investment verdicts(Invest/watch/pass) with confidence scoring.
- Designed a state full agent workflow, which structure, Jason outputs, enabling dynamic report, generation with score bar, pros/cons, and analyst insights.

Tech: next.JS, LangGraph.JS, Gemini 1.5 Flash, TypeScript, AI agents, LLMs

Fake Profile Detection using | [Github](#)

Jan' 26

- Built a deep learning base, fake profile detection system to classify social media profile images as fake or real using transfer learning with MobilenetV2.
- Preprocessed and balanced the dataset with image resizing, augmentation and train-validation splitting to improve model generalisation.
- Fine tuned the model using feature extraction, binary classification, and performance evaluation metrics.

Tech: Google Colab, Python, Tenser Flow, MobileNetV2, NumPy, Deep Learning, Computer Vision.

SewaTrack - Civic Complaint Management App | [Github](#)

Mar' 26

- Developed an Android application for reporting civic issues with photo upload, location tagging and real-time complaint tracking.
- Implemented role-based workflows for citizens, employees and admin with complaint assignment and status.
- Integrated Firebase services for secure authentication, real-time database synchronization.

Tech: Kotlin, Jetpack Compose, Firebase, Firestore, MVVM.

TRAINING

Advanced Data Structure and algorithms [Certificate](#)

Jun' 25- Jul' 25

- Completed intensive training in Advanced Data Structures including Trees, graphs and heaps.
- Gained hands on experience, implementing complex data structures and algorithms using C++.
- Applied advanced concept to solve real world, organic algorithmic problems, strengths, strengthening skills in time-space complexity analysis and problem solving.

CERTIFICATES

- Introduction to cloud computing | [NPTEL](#)
- AI foundations | [oracle](#)
- Data base management | [oracle](#)

Oct' 25

April' 26

May' 26

ACHIEVEMENTS

- Solved 160+ Data Structures & Algorithms problems on LeetCode
- Qualified to Round in a hackathon, demonstrating strong problem-solving and teamwork

EDUCATION

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering **CGPA: 6.71**

Phagwara, Punjab

Since Aug' 23

Sri Chaitanya Junior College

Intermediate; **Percentage: 93**

Hyderabad, Telangana

Apr' 20 – Mar' 22

Sri Chaitanya Techno School

Matriculation; **Percentage: 98**

Hyderabad, Telangana

Apr' 19 – Mar' 20
